Natural Handcut Stone

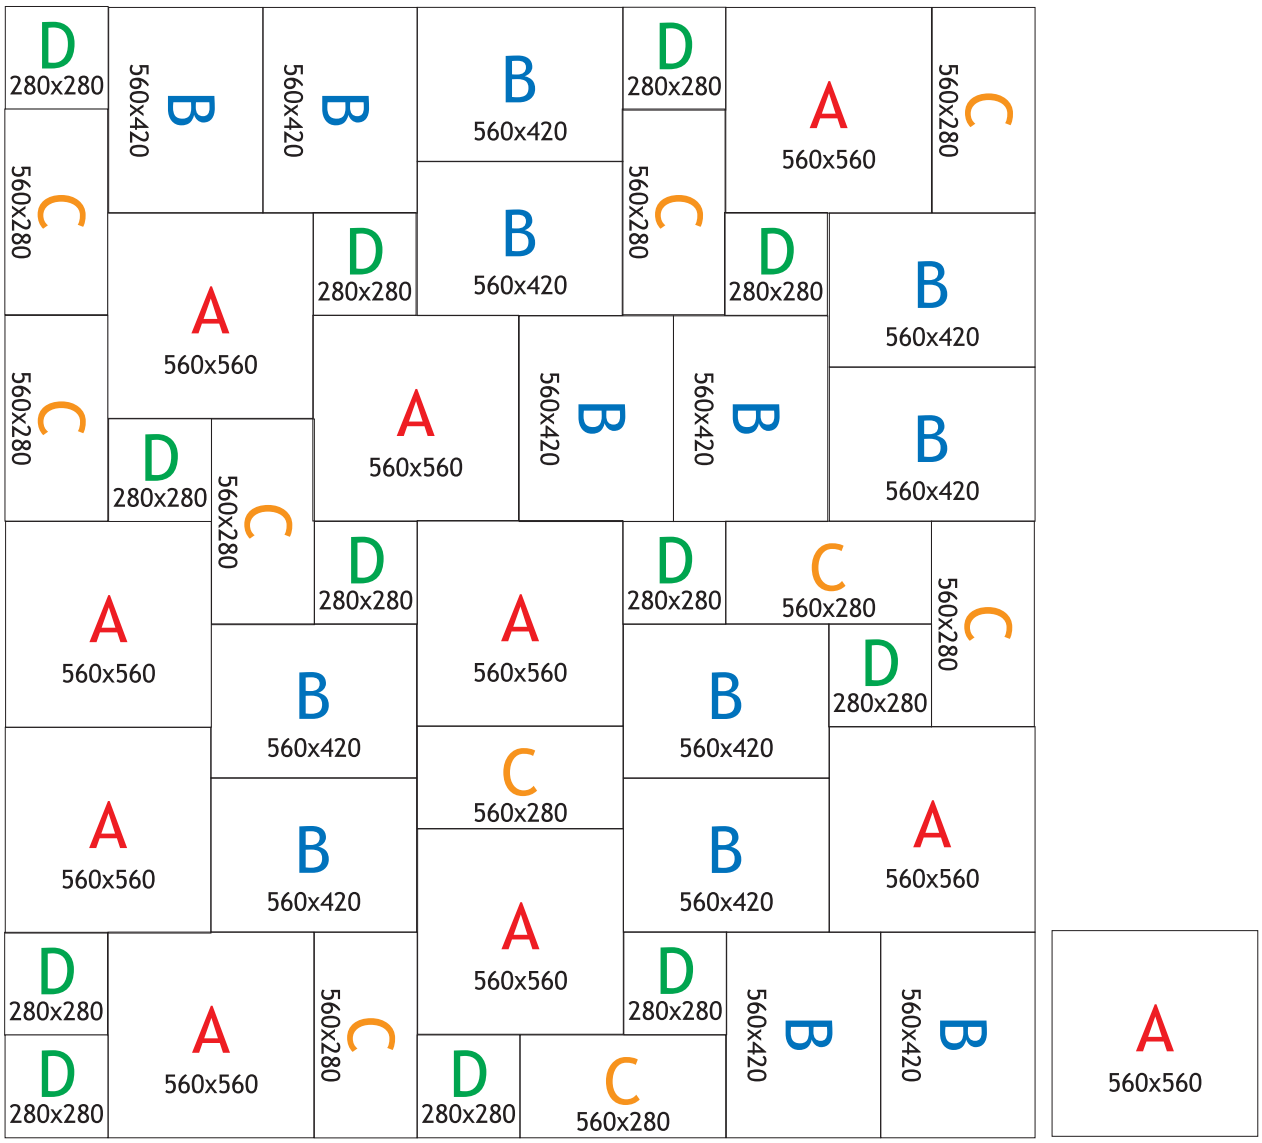
Measuring and laying guide for 8.94 square metre pattern

ITEM	SIZE(mm)	QTY
A	560x560	10
B	560x420	14
C	560x280	10
D	280x280	12

To measure and estimate the number of paving stones for your area, measure and then multiply the length by the width, this will give you the square metres of paving required.

Then divide this number by 8.94 and then multiply this figure by the number of paving stones for the laying pattern below. This will give you an approximate amount of paving stones needed for your area.

(Where the area does not divide equally, simply add individual paving stones to complete the area).



This project pack covers approximately 8.94 square metres

Take care when accessing the crate and also handling items, be aware that they may fall towards you, some are heavy and may have sharp edges. Do not allow children to climb/play on the products.
These items are made of natural materials size and colour variations will occur.
